

Catalog No.: **D116L**

Product Name: **dNTP PreMix**

Size: 5 x 500µl

Concentration: 10mM each (40mM total)

Storage: Store at -20°C.

Description: This package contains a mixture of 500µl of the four deoxyribonucleotide solutions (dATP, dCTP, dGTP and dTTP), each at 10mM. The nucleotides are supplied in sterile, doubly distilled water. The final concentrations for each of the four deoxyribonucleotides are:

dATP: 10mM dATP (2'-deoxyadenosine 5'-triphosphate, sodium salt) C₁₀H₁₂N₅O₁₂P₃Na₄
F.W. 579.2

dCTP: 10mM dCTP (2'-deoxycytidine 5'-triphosphate, sodium salt) C₉H₁₂N₃O₁₃P₃Na₄
F.W. 555.1

dGTP: 10mM dGTP (2'-deoxyguanosine 5'-triphosphate, sodium salt) C₁₀H₁₂N₅O₁₃P₃Na₄
F.W. 595.1

dTTP: 10mM dTTP (2'-deoxythymidine 5'-triphosphate, sodium salt) C₁₀H₁₃N₂O₁₄P₃Na₄
F.W. 570.1

Quality Control:

1. Nucleotide concentrations are determined by measurements of absorbency.
2. Deoxyribonucleotides are certified free of nucleases and phosphatases.
3. Functional purity is tested in Sanger dideoxy sequencing reactions, fill in of 5'-overhangs, and primer extensions, using Klenow and Taq DNA polymerase.
4. The physical purity of this preparation is determined by HPLC (minimum passing specification is >99% triphosphate).
